Integrated Path Undergraduate Studies

COLLÈGE
ANDRÉ-GRASSET

Collège
de Bois-de-Boulogne

What is the Integrated Path?

Designed specifically for American students, the Integrated Path is a comprehensive program that offers ongoing guidance and support as you earn your bachelor's degree.

This 4-year program was developed for non-French speaking students who wish to study in one of Université de Montréal's 31 undergraduate programs.

The main objective of the Integrated Path program is to give you the tools you need to succeed during your academic years. The mentoring program and individual support offered through Integrated Path will help you integrate into your new environment.

What are the advantages of the Integrated Path?

- Mentoring program and ongoing support to guide you step by step as you work towards your Bachelor's degree
- Additional French courses to perfect your skills
- Elective courses that cater to your interests
- Cultural activities to better understand Quebec
- The chance to learn and live in Montreal, one of the most vibrant, exciting and amazing cities for students in the world

Why Université de Montréal?

First-Rate Campus and Services

A city-within-a-city, UdeM's main campus offers world-class facilities, faculty, and services for international students. You will find everything you need on campus, but when you want to explore Montreal, the school is optimally located in the heart of the city and close to public transportations.

Prestige

UdeM offers world-class education in all fields of study. Here, you have everything you need for an enriching international experience that will open you to new horizons. UdeM consistently earns high rankings in the serious international publications. UdeM is:

- In the top 1% of the worldwide university ranking
- 44th university for employability worldwide
- The second largest university in Canada, with 400,000 graduates around the world!

Affordable Education

You may already know that in Canada, tuition fees are much lower than in many other countries. That's because all Canadians share the cost of education in order to make it accessible to more students. This means you have access to the highest caliber of education at a fraction of the cost of American schools.

- For example, tuition fees can be approximately 17,500 Canadian dollars per year (which is currently about 14,100 US dollars!)
- Housing and the cost of living are also very affordable in Montreal compared to other North American cities

ONE BIG COMMUNITY...

66,768	students at all levels
400,000	graduates around the world
9,343	students from 140 countries
50	countries where you can study abroad
523	million dollars in research revenue
23	high-level sports teams

ALL THAT IS MISSING IS YOU!

Your journey towards your Bachelor’s degree will begin with 1 year at Pre-University College, followed by 3 years at Université de Montréal.

Specialized Bachelor’s Degree

Year 1 (Prep Year)

You will attend one of Montréal’s renowned Pre-University Colleges, Collège Bois-de-Boulogne or Collège André-Grasset, to help you get a head start with French immersion classes, as well as university core courses. The wide variety of optional courses offered will allow you to build your own curriculum, based on your interests.

After the prep year, you will be fluent in French and ready for the next part of the journey: earning your Bachelor’s degree.

Years 2-4 (Bachelor Program)

At the end of your first year, you can choose to specialize in any one of the 31 programs offered at Université de Montréal. You can select anything from Human Sciences to Health Sciences, Pure and Applied Sciences, Education Sciences, Architecture, Urban Studies and more. Your counselor will advise you on the qualifying requirements of each program. Your classes and assignments will be in French.

At the end of it all, the UdeM diploma that you earn will attest that you have advanced French language levels along with your BA specialization.

Undergraduate Programs

Anthropology	Economic Sciences	Mathematics and Physics
